Remediates these and more

Crude oil	Gasoline	Cutting Fluids
Fuel Oils	Jet fuel	Lubricating Oil
Glycols	Diesel	Hydraulic Oil
Skydrol	Grease	Motor Oil

Applications	Heavy	Medium	Light
Scrubber	1:20	1:30	1:40
Mopping	1:5	1:10	1:15
Degreasing	1:2	1:4	1:8

**Mopping:**

Fill container with properly diluted product. For best results, with oily floors or visible oil, allow the solution to remain on the surface for about 30 seconds before mopping. Liberally apply to floor with a wet mop and agitate solution into surface.

**Auto Floor Scrubber:**

Start with a 1:25 dilution rate and adjust after testing. For best results employ the double scrub method. For the first scrubber pass do not lower the squeegee. Spray solution while scrubbing. For the second pass spray solution, scrub and lower squeegee for soiled water removal

**Degreasing:**

Fill container with properly diluted product. The dilution rate may be determined if the operator will be using rags to clean (stronger), scrub brush (medium), or rinsing with a power washer (weaker). When cleaning heavy oil/grease deposits, allow product to soak for 1-2 minutes before removing. Ratio depends on soil type and concentration
